

Prateek Katiyar

Software / Full-Stack Developer / GenAI

Kanpur, 208025 | (+91) 8081218241 | prateek.katiyar216@gmail.com

TryHackMe | HackerRank | LeetCode | LinkedIn

Professional Summary

Software and Full-Stack Developer with experience building mobile applications, GenAI/RAG systems, real-time data solutions, and machine learning applications. Hands-on experience with React Native, Expo, Firebase, Python, Flask, vector databases, and LLM-based applications, with additional experience in cybersecurity and networking.

Technical Skills

Frontend	HTML, CSS, Tailwind, Bootstrap, Bulma, JavaScript, React, Vue, Angular
Mobile	React Native, Expo, Mobile App Development
Backend	Python, Flask
Generative AI	GenAI, RAG, Vector Databases, LLM Applications
Machine Learning	Scikit-learn, TensorFlow, PyTorch, NumPy, Pandas
Programming	Python, C, C++
Database	MySQL, PL/SQL, Firebase, Firestore, Firebase Authentication
Other	DSA, Ethical Hacking, Kali Linux, Networking, CI/CD

Education

Maharana Institute Of Professional Studies, Kanpur	2022 – 2026
Bachelor of Technology (B.Tech)	
Prabhat Public School, Kanpur	2021
Higher Secondary (10+2) — Physics, Chemistry, Mathematics	

Experience

Mobile Application Developer — Technico Industries Ltd	May 2026 – Present
- Develop mobile applications using React Native and Expo for production and operational workflows. - Integrate Firebase Firestore and Authentication for real-time data storage, synchronization, and secure access. - Build RAG-based chatbot functionality for querying and retrieving relevant organizational information. - Develop live data visualization features for monitoring production and operational metrics. - Collaborate with cross-functional teams to develop data-driven mobile solutions and improve operational visibility.	
Cyber Security Intern — C3iHub, IIT Kanpur	May 2025 – July 2025
Mentor: Mr. Anuj Arya - Worked on cybersecurity fundamentals, secure systems, and cyber defense strategies. - Gained hands-on experience in penetration testing and network security.	

Projects

RAG Chatbot [Live Demo]	Python GenAI RAG Vector Database
- Developed a Retrieval-Augmented Generation chatbot for querying information from custom documents. - Implemented document processing, embeddings, vector search, and LLM-based contextual response generation.	
House Price Prediction [GitHub]	Python Machine Learning
Built a Linear Regression model to predict property prices based on housing features.	
Suspicious Login Detection [GitHub]	HTML CSS JS Flask

- Developed an ML-based login system that detects suspicious activity using IP, GPS, and browser data.

Civic Report System Mobile App
[\[GitHub\]](#) [\[Live Demo\]](#)

React Native | Expo

- Built and deployed a mobile application for reporting and tracking civic issues with location-based monitoring.

Certifications

- **Learn Ethical Hacking From Scratch** — Udemy, May 2025 [\[Certificate\]](#)
- **Cisco Networking Academy Ethical Hacker Certification** — Aug 2025 [\[Certificate\]](#)
